SIM&S integrated solutions include E-911, mass notification, early warning, vehicle inspection, public safety, alarm monitoring and security guard services.

Electronic Security & Safety

We offer customized security programs and competitive pricing.

SIM&S provides physical and electronic security solutions as well as integrated solutions, such as E-911, mass notification, and early warning systems. The following illustrates our expertise in key functional areas of electronic security services and solutions.

VEHICLE INSPECTION

SIM&S is a commercial provider of Mobile Vehicle and Cargo Inspection System (MVACIS) operation services. The MVACIS is a gamma-ray cargo scanning system developed by SAIC. We provide MVACIS support at U.S. Army installations. We also operate a similar vehicle manufactured by L3 Communications, an X-ray based system.

PUBLIC SAFETY

We provide 911, CCTV, early warning, and mass notification solutions for the military. Our systems are designed to support the military's unique environments. We build the campus address database, load maps, interface telephony systems, and train customers to operate and respond to emergency calls. Our mass notification systems are fully integrated with our E-911 systems. We offer a full range of public safety solutions and provide certified resources to operate and maintain these critical systems.

ALARM MONITORING

SIM&S provides professionals to serve as public safety call takers, dispatchers and alarm monitors. They are responsible for taking emergency and non-emergency calls from the installation communities. Ancillary functions performed in conjunction with alarm monitoring include after-hours Public Works and Explosive Ordinance Disposal telephone answering services. Upon receipt of an alarm or call, SIM&S personnel dispatch first-responders to the appropriate location using available Computer-Aided Dispatch or Automated Location Identification systems. Personnel also monitor weather alerts and broadcast alerts across local radio nets.

VEHICLE REGISTRATION/PASS & ID

SIM&S provides Vehicle Registration/Pass & ID services for military campuses. We verify identification and validate need for access to permit temporary or permanent installation access.

SECURITY GUARD SERVICES

SIM&S is a licensed security guard company. Our guard services include armed, unarmed, CCTV, and patrol services.
